

13A solar module price

Overview

As of 2024, the average cost of a 13kW solar system in the United States ranges from \$27,000 to \$37,000 before incentives or rebates. This price includes equipment, installation, and other associated costs. However, prices can vary significantly based on several factors: The 13.2 KW REC400AA Roof Mounted System is designed for large properties with high energy demands. We offer optional single-line drawings, comprehensive permit. Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. BC module prices in China will be added. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost models for solar-plus-storage systems.
