

300 megawatts of solar energy

Overview

Today, Duke Energy Florida submitted a filing to the Florida Public Service Commission (FPSC), outlining plans for four new solar energy sites that will add nearly 300 megawatts (MW) to the electric grid by early 2027. Four new solar energy sites will save customers an estimated \$1 billion over their service lifetimes. During construction, each solar site will create an average of 150 temporary jobs, and when completed. Novem- St.

300 megawatts of solar energy

Duke Energy Florida files plans for four new solar energy sites, adding

During construction, each solar site will create an average of 150 temporary jobs, and when completed, they will add nearly 300 megawatts of quiet, carbon-free energy to the electric grid.
