

315 Price of photovoltaic panels

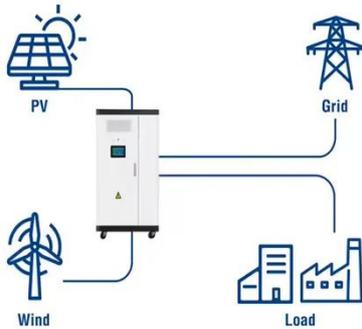

Overview

Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) – Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. Refurbished 315W panels offer exceptional value at \$0.57 per watt – representing 50-70% cost savings compared to new panels while maintaining proven performance, making them ideal for budget-conscious installations with adequate space. Global estimates are used before 2010; European market. A 315W solar panel is a standard choice for a residential installation. Solar panel 315 watts may be enough for an RV without any super energy-consuming devices. Higher. Solar panels can lower your electricity bill by 75% or more, but the upfront investment is significant. Consider the power of the 315 W panel.
