

# 60kW solar inverter output power

## Overview

---

A 60kW Solar Kit requires up to 4,300 square feet of space. This could produce an estimated 7,000 kilowatt hours (kWh) of alternating current (AC) power per month, assuming at least 5 sun hours per day with the solar. See Installation Guide for more details on sizing array strings. The highest input voltage is based on the open-circuit voltage of the array at the minimum design temperature. Active BMS communication is required for all lithium batteries. Nicely packaged for added efficiency. Supports simultaneous DC and AC coupling. Boosts PV energy. This high-power, low cost solar energy system generates 60,160 watts (60 kW) of grid-tied electricity with (102) 590 watt Axitec XXL bi-facial model PS590M8GF-24/TNH, GoodWe single-phase string inverters, 24/7 monitoring, disconnect box, rooftop. Harvest solar energy and generate environmental-friendly power for increased return on investment brought by high yields with your commercial PV system. All models with aluminum housings which are anodized, increasing durability and effectively preventing corrosion. Equipped with external inductors, ensures efficient heat. S6-GC30K-LV-US and S5-GC60K-LV-US string inverters are suitable for three-phase commercial rooftop PV projects with grid voltage of 240 or 208VAC.
