

# Airport Energy Storage Project

## Overview

---

To be erected as a canopy in one of JFK's long-term parking lots, the solar carport will generate around 12 megawatts (MW) of onsite power paired with an additional 7. Parking Lot Canopy with Solar Panels and Accompanying Battery Storage System Will Reduce Greenhouse Gas Emissions by Approximately 6,000 Metric Tons Annually The 12-Megawatt Solar Project will Reduce Airport Energy Use at Peak Hours and Support the Port Authority's 2050 Net Zero Goal Across the. New York/Houston, Ap- TotalEnergies has begun construction of New York State's largest onsite solar generating and storage system at John F. Kennedy (JFK) International Airport in partnership with the Port Authority of New York and New Jersey (PANYNJ) and the New York Power Authority. Major airport electric investments are incoming, to say nothing of battery-powered electric aircraft that require substantial charging supplies on the ground. With 30-year decision-making in the air, researchers at NREL, a U. Department of Energy national laboratory, are using the Advanced.

## Airport Energy Storage Project

### Home Energy Storage (Stackble system)

- Product Introduction**
- Scaleable from 10 kWh to 50 kWh
  - Self-Consumption Optimization
  - Integrated with inverter to avoid the compatibility problem
  - LFP battery, safest and long cycle life
  - Stackable design, effortless installation
  - Capable of High-Powered Emergency Backup and Off-Grid Function

### Beyond Flights: Airports Could Bolster Grid Security and Adaptability

By NREL's analysis, airports can optimize the value of their energy investments by building local generation--like battery storage--and by supplying electricity back to the local grid to bolster its ...
