

Algeria 2025 rooftop solar panels

Overview

Algeria commissioned 400 megawatts of new solar photovoltaic capacity in 2025, placing it among Africa's top 10 solar markets. Algeria remains far from its target of installing 15 gigawatts of. The first two solar power plants under Algeria's flagship 3,200 MW renewable energy initiative are expected to come online before the end of 2025, the Ministry of Energy said on Monday. By including a local content clause, the North African nation aims to build an industry around renewable energy. The Ministry of Energy announced that the. Algeria is practically swimming in sunshine—we're talking some of the highest solar irradiance levels you'll find anywhere on the planet (think 1,850-2,100 kWh/m²/year!). Driven by ambitious government programs and increasing private sector investment, the country is rapidly expanding its solar energy capacity and infrastructure.
