

# Analysis of the current situation of wind power generation

## Overview

---

Q1 2025 wind installations more than doubled compared to the same period last year, but regulatory uncertainty drove turbine orders down 50% in the first half of 2025—reaching their lowest level since 2020. Global Wind Power Growth Accelerates in the First Half of 2025 The report can here be downloaded in pdf format The world's wind power sector recorded strong growth in the first half of 2025, with global installations rising by 64% compared to the same period of 2024. The latest quarterly analysis from Wood Mackenzie and the American Clean Power Association. The expansion of wind energy has progressed rapidly in recent years. Since 2014, the installed capacity has almost tripled globally. To stay competitive in this sector, the Energy Department invests in wind research and development projects, both on land and offshore, to advance technology innovations, create job opportunities and.
