

Annual rate of return of solar power generation

Overview

Solar farm investments currently average an annual ROI of 13. By comparison, stocks typically yield 7% to 10% annually, bonds offer returns between 3% and 5%, and real estate averages 6% to 10%. Return on Investment (ROI) measures total profitability relative to the initial investment. The formula is simple: $(\text{Net Profit} / \text{Initial Investment}) \times 100$. Data source: Energy Institute - Statistical Review of World Energy (2025) – Learn more about this data Figures are based on gross generation and do not account for cross-border electricity supply. To guarantee a good outcome, our team of experts will analyze your energy needs and design a solar system. The returns are measured by the Net Present Value (NPV), Internal Rate of Revenue (IRR), and Payback Period. With this article, we aim to help you understand these terms, their implications, and attempt to make this journey smoother for you as a consumer. The solar. The International Renewable Energy Agency (IRENA) reports that, between 2010 and 2023, the global weighted average levelized cost of energy of concentrating solar power (CSP) fell from \$0.39/kilowatt-hours (kWh) to under \$0. IRENA reports significant cost declines for all.
