

Are photovoltaic panels worth investing in Why

Overview

The pros of using solar panels include a lower carbon footprint, lower electric bills, potentially higher home value and tax credits. With current tax credits and incentives, the average payback period for solar panels is between six and 10 years. In other words, you can recoup the money. Geographic Viability Extends Beyond Sun-Rich States: Even moderate solar resource areas like the Mid-Atlantic and Midwest can be financially viable due to high electricity rates and strong state incentive programs, challenging the misconception that solar only works in southwestern states. But is it the right time -- and the correct choice -- for your home?

Solar energy and panels have many pros, from the obvious benefits of saving on energy costs to the incentives that help lower the cost and maximize your. Here's the truth: For most homeowners, solar panels are absolutely worth it.
