

Are solar products shipped in cabinet

Overview

Solar modules are shipped in containers and others that helps to protect them from the elements and keep them secure during transit. The average container can hold around 50 solar modules, although this will vary depending on the size and type of module being shipped. We do NOT provide shipping to South America, Europe, Africa, the Middle East, or Asia. How are solar panels shipped?

1. Packaging involves specialized materials that prevent damage, securing. For Oversize Freight Orders: After you complete your purchase and your items have been shipped, a Solaris Customer Service Representative will contact you directly with tracking information and a delivery schedule. We work with the top freight carriers XPO, FedEx, ODFL, R&L etc. Freight shipments are delivered. A forklift or crane can be used to transport the Product to its final location. To transport, the fork must be in the middle position to prevent overloading. For more than 12 months in its original package, recharging might be required.
