

Australian photovoltaic container manufacturer 20kW

Overview

This compact 8ft foldable PV container combines 18kW solar generation and 20kWh storage, offering a versatile and transportable solar energy solution. Power where the grid can't go — delivered in a single, rugged container. MyEnergy designs and builds turnkey off-grid systems inside 10-, 20- or 40-foot containers, pre-wired, factory-tested and ready to run the moment they land on site. AVID's solar design, installation, commissioning and monitoring services are operated by our teams of skilled engineers and qualified electricians. The solar array is mounted directly onto the container, and can provide both off-grid and grid-tied functionality, with all necessary equipment to ensure safe and. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. It delivers reliable, efficient performance for properties with high daily electricity needs making it an ideal investment for long-term.
