

Austria solar energy storage project planning

Overview

Austria intends to launch a “Made in Europe” bonus for solar and energy storage projects, while also reducing renewable energy funding in 2025 to the lowest level allowed by law, the energy ministry announced this week. Austria's solar energy sector is poised for a major transformation with updated government subsidy guidelines taking effect on Janu. As part of the latest Austria renewable energy news, these regulations are designed to encourage more power purchase agreements (PPAs) for solar PV.
