

Base station battery model

Overview

The Base Station takes four (4) 1. 2V, 1300mAh nickel-metal hydride (NiMH) rechargeable batteries. Regular alkaline batteries should never be inserted into the Base Station, as they may damage the device. Choose your system to learn more. With the large-scale rollout of 5G networks and the rapid deployment of edge-computing base stations, the core requirements for base station power systems —stability, cost-efficiency, and adaptability—have become more critical than ever. 2V Nominal Capacity: 100Ah Dimension: 53. With military-grade construction, smart BMS, and proven reliability, these batteries outperform traditional lead-acid by 3x while providing consistent power throughout the discharge cycle. 0 discharge current: 50A instantaneous discharge current: 300A.
