

Basic price of supercapacitor

Overview

A supercapacitor (SC), also called an ultracapacitor, is a high-capacity, with a value much higher than solid-state capacitors but with lower limits. It bridges the gap between and . It typically stores 10 to 100 times more or than electrolytic capacitors, can accept and deliver charge much faster than batteries, and tolerates many more than rechargeable batteries.

Supercapacitors: the economics?

The costs of supercapacitors are tabulated in this data-file, with a typical system storing 15-seconds of electricity, for a capex cost around \$10,000/kWh of energy but just \$40/kW of power.
