

Bissau electric vehicle adoption

Overview

Guinea-Bissau's electric vehicle (EV) market is still in its early stages but mirrors the broader growth patterns seen across Africa. Understanding the current trends in adoption, infrastructure, and policies provides a clearer picture of the opportunities and challenges in this emerging sector. Infrastructural development for electricity in Guinea Bissau has made a modest headway. The development of mini-grids and the planned installation of the national grid have brought rural electrification to dozens of. Which African nations are ready to lead in EV adoption, and which risk falling behind?

Our new Africa EV Readiness and Impact Index provides answers, and includes interactive maps showing continent-wide EV readiness and impact performance and a detailed methodology. More than 120 nations have announced plans to hit net zero in the years up to 2050 and a switch to electric cars plays a key role in reducing.
