

Bulgarian solar glass

Overview

With its strategic location and government incentives for clean energy, the country produces high-performance photovoltaic (PV) glass that combines durability with cost-efficiency. Think of it as the "skin" of a solar panel a critical component protecting cells while maximizing light. Ardagh Glass Packaging-Europe (AGP-Europe) has secured a deal for renewable energy supply to its glass manufacturing operations across Europe from April 2026. It has entered a long-term Virtual Power Purchase Agreement (VPPA) with Rezolv Energy's St. The deal will provide AGP's European glass manufacturing operations with renewable electricity from the St. George solar photovoltaic (PV).
