

Cambodia energy storage battery group

Overview

Huawei Digital Power, in collaboration with SchneiTec, has successfully commissioned Cambodia's first-ever TÜV SÜD-certified grid-forming energy storage project, marking a key milestone in the country's transition toward a sustainable energy future. This project showcases a 64kWh home battery system in Cambodia, designed to improve power reliability and energy independence in a local residential application. Learn how innovative technology its commitment to clean energy transition. Cambodia's power grid resembles a patchwork quilt: The government's 2023 Power Development Plan aims for 70% renewable energy by 2030. Frequent grid fluctuations and rising energy prices are accelerating the adoption of residential energy storage solutions.
