

Can a few boxes of cigarettes be stacked on photovoltaic panels

Overview

The spacing between boxes should be greater than 30cm(Figure 10); Please do not stack other items on the modules or boxes (Figure 11). Cut off straps within the two pallets, and use a forklift to separate the two pallets. Up to three stacks of 40 panels can be arranged side by side, accommodating a total of 120 panels per pallet. To ensure stability, alternate the orientation of the panel junction boxes, stacking panels. Solar panels are typically either horizontally or vertically stacked in a box. Usually, separators are placed between each module, and extra protections are added to the four corners of each module stack. Packaging and wrapping variation may result in slightly lower actual weights. Let's unpack this hot topic that's.

Basics of solar panel packaging

Solar Panel Packaging Basics Problems of Bad Packaging Dangers During Loading and Transport Horizontally stacked each on top of each other can cause stresses on the panels below that can lead to defects clients do not detect for a long time, especially micro-cracks that even grow and show their detrimental impacts after time only. Packed horizontally, the solar panels are usually separated with either carton or plastic separators. Most
