

Can asphalt roofs be used as photovoltaic panels

Overview

Yes, solar panels can be installed on asphalt shingles, but roof age, material quality, and installation methods all affect durability and long-term performance. What Types of Roofs Can Solar Panels be Installed On?

Short answer: most of them!. Photovoltaic (PV) systems convert sunlight into electricity. The two common attachment methods are rack-mounted and roof-integrated: The latter method is sometimes referred to as building integrated. Different roofing materials like asphalt, metal, and tile vary in compatibility with solar installations based on durability and installation methods. If you're considering adding solar panels to your roof, you've probably wondered: Is my asphalt shingle roof compatible?

The good news is yes — in fact, asphalt shingles are one of. But one of the biggest concerns is whether their existing asphalt shingle roof can support solar panels.
