

# Can energy storage cabinet batteries be used at home

## Overview

---

Home backup batteries store electricity for later use and can be used with or without solar panels. The average battery cost on EnergySage is \$1,128/kWh of stored energy. If you have access to state and local battery incentives, they can help reduce costs. Central to these systems are battery cabinets—robust enclosures that house batteries safely and efficiently. These are not just “cool tech,” but practical tools offering real value. In this article, we'll discuss 10 benefits of using an energy cabinet in your home, why they matter today. In today's world, where energy efficiency and sustainability are paramount, domestic battery storage has become a vital solution for homeowners. The battery is charged by an onsite power source—typically a rooftop solar photovoltaic (PV) system—or by drawing energy from the utility grid.
