

Can solar photovoltaic panels be used together with city electricity

Overview

The answer is yes—it is absolutely possible to use solar panels and traditional electricity at the same time in one system. Some PV cells can convert artificial light into electricity. These photons contain varying amounts of.

Can solar photovoltaic panels be used together with city electricity

Photovoltaics and electricity

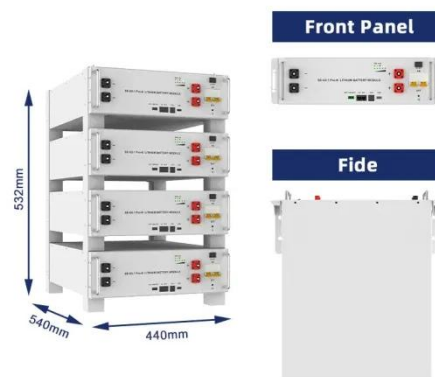

PV systems can supply electricity in locations where electricity distribution systems (power lines) do not exist, and they can also supply electricity to electric power grids.
