

# Carbon trading for solar power plants

## Overview

---

Carbon credits trading is selling carbon credits from solar energy. For example, a solar farm that offsets 10,000 tons of CO<sub>2</sub> each year can sell these credits to companies that need to offset their emissions. This creates a win-win situation, supporting both sustainability and. **Market Growth Acceleration:** The voluntary carbon market is projected to reach \$23. 99 billion by 2030, driven by over 2,700 companies with Science-Based Targets—a 65% increase from 2023. This corporate demand surge creates unprecedented opportunities for solar system owners to monetize their. Solar energy offers more than just clean power—it provides an opportunity to earn revenue through solar panel carbon credits. However, it's the homeowners and commercial property owners that don't know.
