

# Chile's first batch of energy storage power station companies

## Overview

---

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable alternative for Chilean power producers. Trina Storage has shipped the first 1. This milestone validates the technical adaptability in extreme. In María Elena, Antofagasta Region, Generadora Metropolitana —owned by AME and EDF power solutions Chile— officially began construction of Dune Plus, one of the largest energy storage projects in Chile. The country as part of that ambition has a goal of producing at least 70% of its electricity from renewable energy by the end of. With 23 energy storage projects already approved, totaling an impressive 3,000 MW of capacity, Chile is at the forefront of innovation and efficiency in Latin America. Since Chilean co-located storage assets don't require an Environmental Impact.
