

China-Africa solar Modules

Overview

According to a new analysis of China's solar panel exports data from energy think tank Ember, solar panel imports into the continent jumped 60% in the 12 months through June 2025, setting a record that could reshape electricity systems in many countries. In that period, Africa imported 15,032. Africa is slowly stepping into the solar spotlight. According to the Africa Solar Industry Association (AFSIA) in 2024, the continent added 2. An aerial view of the 100 MW solar thermal power project built by a Chinese company in South Africa's. Chinese exhibitors present products to guests during the Intersolar Africa 2026 in Nairobi on Tuesday. What makes this story remarkable is not just the headline numbers, but who is leading the surge.
