

China sodium energy storage plans sodium battery replacement

Overview

CATL introduced its Naxtra line of batteries earlier in 2025 and has now announced plans for volume production of sodium-ion batteries this year, with integration into production electric vehicles by July. Battery technology is strategic for the world's largest. China has a goal to install 180 gigawatts of battery energy storage systems by the end of 2027, with a direct project investment of \$35.8 gigawatts, 40% of the global total. Although current cost advantages remain limited, industrial scaling is expected to improve competitiveness.

China sodium energy storage plans sodium battery replacement

Experts: sodium-ion batteries to enter large-scale applications by 2026

Government agencies, including the Ministry of Industry and Information Technology and the National Energy Administration, have designated sodium-ion batteries as a priority direction for ...
