

Clean electricity micronesia

Overview

The country is striving to overcome electricity access needs, reduce high energy costs, and ensure energy security. Currently, almost all of the electricity produced in Micronesia is dependent upon imported petroleum based fossil fuels, with some solar photovoltaic systems. POHNPEI, May 28 2025 — Thousands of families across the Federated States of Micronesia (FSM) will benefit from better, more reliable electricity under a new project to be implemented by the Government of FSM with financing and technical support from the World Bank. The US\$42 million Access and. Kosrae, Federated States of Micronesia - The Federated States of Micronesia (FSM) proudly launched its National Energy Policy 2024-2050 and SDG 7 Roadmap, marking a transformative step towards a sustainable and inclusive energy future. A large advocate of environmental policy, renewable energy in Micronesia has a long history behind it. Through many years of struggle and advancements, Micronesia has made its intentions for a. We aim for a Blue Pacific to be a well-being economy through a balance of sustainable economic growth, protection and inclusive distribution of resources, energy secure, healthy, and resilient communities with livelihoods sustained through trade, maritime connectivity, and harmonious relationships. “This project is a critical step toward achieving our national energy goals and delivering real benefits to our communities,” said Elina Akinaga, Secretary of FSM's Department of Resources and Development. The initiative, backed by the World Bank, involves a \$42 million investment under the Access and Renewable Increase for Sustainable Energy (ARISE).
