

Commercial solar montenegro

Overview

Investors in Montenegro plan to build four solar power plants with a combined capacity of 127 MW, three of which will be located on the territory of the country's capital, Podgorica. EPCG Solar Construction reported a notable increase in solar capacity additions during June and July 2025, installing a total of 6.7 megawatts (MW) of new capacity. This marks a significant rise compared to the 5.2 MW added during the same period last year. The Government of Montenegro has issued urban planning and technical requirements for the construction of the four. In recent years, Montenegro, a small country on the Adriatic coast, has become an unexpected leader in rooftop solar energy. This marks the country's second attempt to develop a large-scale solar facility at this location. The facility is structured. UGT Renewables is partnering with state-owned power utility Elektroprivreda Crne Gore (EPCG) to aid Montenegro in a swift and efficient transition to a cleaner, greener energy generation base. The utility-scale solar PV plants and energy storage in development will help Montenegro alleviate the.
