

Commissioning of 2mwh inverter for solar telecom integrated cabinet

Overview

This section describes the commissioning procedure and gives an overview of the steps you must perform in the prescribed order. Commissioning an SMA Energy System (see system manual of the SMA Energy System). Ensure the installation location is well-ventilated, dry, and free from direct sunlight, preventing overheating. Traditionally, the main power grid is necessary for commissioning of the equipment, such as inverters, transformers, Ring Main Unit (RMU) and monitoring equipment before the PV plant is officially put into operation.

Commissioning of 2mwh inverter for solar telecom integrated cabin

Off-grid Commissioning Solution Whitepaper

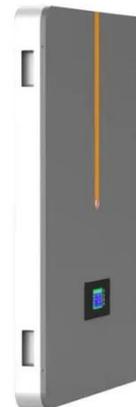

The off-grid commissioning technology is an ideal solution that can be adopted to complete all the commissioning work of the inverter and other equipment though the main power grid is not powered on.
