How high should the inverter for a communication base station be

A base station is a device that serves as the hub of a wireless communication

system. It is typically responsible for transmitting and receiving signals to and from mobile devices, such as

What is the work of the communication base station inverter signal

When a wireless device, such as a mobile phone, communicates with a

base station, the device sends a signal to the base station, which converts the signal into digital form and sends it to the network.
