

# Construction of Cape Verde Wind Solar and Energy Storage Project

## Overview

---

Cape Verde has inaugurated a major expansion of its flagship Cabeolica Wind Farm, adding new wind capacity and one of Africa's most advanced battery energy storage systems (BESS), in a project backed by the Africa Finance Corporation (AFC). Prime Minister Ulisses Correia e Silva presided over the Africa Finance Corporation (AFC) and public-private-partnership (PPP) Cabeolica inauguration on 13 December. Announced earlier this week (8 December), AFC and Cabeolica have officially opened the Cabeolica. In a move that has effectively put the islands on the map in the latest projects, Cape Verde massively boosted its wind power and battery storage, pushing renewables close to one-third of the electricity supply. This promise has been made by the commitment Cabo Verde's dependence on fossil fuels by 2040.

## Construction of Cape Verde Wind Solar and Energy Storage Project
