

# Container Energy Storage Certification Website

**LPW48V100H**  
**48.0V or 51.2V**

## Overview

---

ESAMTAC is an education/training program and credential that prepares electrical contractors and workers for the safe and effective assembly, testing, commissioning, maintenance, repair, retrofitting, and decommissioning of energy storage and microgrid (ESM) systems. Energy storage systems consist of equipment that can store energy safely and conveniently, so that companies can use the stored energy whenever needed. Additionally, they may utilize hazardous materials and moving parts. Following a successful completion of the verification of the specific scope, DNV shall issue a Statement of Compliance. The result can be included in Type and Project Certification service. Selecting an experienced and recognized independent partner to certify energy storage systems and components demonstrates. The North American Board of Certified Energy Practitioners (NABCEP) is excited to announce that our collaborations with the CREATE Energy Center and the Midwest Renewable Energy Association (MREA) to create an Energy Storage Certification have become a reality. With support from a grant issued by.
