

# Cost Analysis of Grid-Connected Solar Energy Storage Units

## Overview

---

This report is available at no cost from NREL at [www. Department of Energy \(DOE\)](http://www.DepartmentofEnergy.gov), operated under Contract No. The Department of Energy's (DOE) Energy Storage Grand Challenge (ESGC) is a comprehensive program to accelerate the development, commercialization, and utilization of next-generation energy storage technologies and sustain American global leadership in energy storage. The program is organized. NREL/TP-6A40-93281. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. The project team would like to acknowledge the support, guidance, and management of Paul Spitsen from the DOE Office of Strategic Analysis, ESGC Policy. The National Laboratory of the Rockies's (NLR's) Storage Futures Study examined energy storage costs broadly and the cost and performance of LIBs specifically (Augustine and Blair, 2021).

## Cost Analysis of Grid-Connected Solar Energy Storage Units

---

### **solar.cgprotection**

Pacific Northwest National Laboratory's 2020 Grid Energy Storage Technologies Cost and Performance Assessment provides a range of cost estimates for technologies in 2020 and 2030 as well as a ...
