

# Cost of using custom outdoor cabinetss for grid connection at australian airports

## Overview

---

This information sheet outlines the fees and charges applicable to customers and developers for Connection Services. The Australian Energy Regulator (AER) determines the classification of services provided by Distribution Network Service providers. The cost of these services can be either directly. While the AS/NZS 5033 standard serves as the foundation for safety and installation, each state's Distribution Network Service Providers (DNSPs) —such as Ausgrid, Endeavour Energy, and SA Power Networks —has its own additional requirements. This makes it difficult to keep track of the different. Watts Advisory is coordinating and managing the connection process for various grid-scale generation projects in various National Electricity Market regions. Rather than loading up parts and hoping it all comes together onsite, we've refined the process. All application fee's as passed through without markup. Contact us to get a full rates sheet.
