

# Cuban New Energy Solar Air Conditioning Room

## Overview

---

This factsheet provides a summary of the GCF Readiness Programme -funded project which is working with the Governments of Cuba, El Salvador and Honduras to help the three countries leapfrog to superior cooling solutions. the project follows a three-pronged approach: enhancing. Currently, Cuba concentrates a large part of its primary energy resources on fossil fuels, including the consumption of petroleum derivatives, which has repercussions on the quality of the environment due to greenhouse gas emissions and the high costs the country incurs for the purchase of these. Regional Project for Leapfrogging to Energy-Efficient and Climate Friendly Air Conditioners in Cuba, El Salvador and Honduras. Cuba, El Salvador and Honduras are three countries situated in the Caribbean/Central American Region, which together represent a surface area of 250,000 km<sup>2</sup>, with. Amid the worst energy crisis in its history, the Cuban regime announced an ambitious plan, which includes the striking goal of generating nearly 600 MW of photovoltaic solar energy during the first half of 2025. Initial Assessment: Households typically start by assessing their energy needs and the suitability of their property for solar.
