

# Damascus renewable energy growth

## Overview

---

The government has set a target to increase the share of renewables in the country's energy mix to 20% by 2030. Once operational, the plant is expected to generate enough electricity to power thousands of homes and businesses, reducing the nation's dependence on fossil fuels. This project is part of Syria's broader strategy to diversify its energy sources and. This report was produced as part of the second round of Al-Jumhuriya's Grant Program for Syrian Women Journalists, which supports the production of in-depth journalistic projects related to topics of public interest in Syria or Syrian diaspora communities. With the lifting of sanctions and efforts to utilize the country's oil resources, Türkiye is expected to play a key role in Syria's energy sector revitalization. Syria's energy system is in ruins.
