

Diqing private solar power generation installation

Overview

According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the permitting stage. It will be developed in a single phase. The project construction is likely to commence in 2025 and is expected to enter into commercial operation. Diqing Solar PV Project is a 125MW solar PV power project. As planned, it will install 166,320 monocrystalline silicon photovoltaic panels, each with a capacity of 660Wp, which are divided. Construction work on Diqing Nagu Solar PV Plant Phase I 100 MW located in Yunnan, China commenced in Q4 2023, after the project was announced in Q1 2023. Read more about Solar capacity ratings. It is a major part of the Huaneng Lancang River Hydropower, Wind, and Solar Integrated Clean Energy Base, located in a high-altitude, uninhabited region of Deqin County. The Diqing Tibetan Autonomous Prefecture's solar farms have seen a 17% efficiency drop last winter according to the 2024 Yunnan Renewable Energy Report. Harsh UV exposure, temperature swings from -15°C to 28°C, and frequent hailstorms create a perfect storm for system degradation.
