

Distributed solar energy storage in Burkina Faso

Standard 20ft containers

Standard 40ft containers

Overview

The Government of Burkina Faso has signed a Public-Private Partnership (PPP) agreement with a local developer and a Dutch clean energy investment firm to develop a major solar and battery storage system. However, the country's energy storage infrastructure remains underdeveloped, limiting access to reliable electricity for 80% of its rural population. Recent investments in solar battery systems. The Ministry of Energy, Mines and Quarries (MEMC) launched Burkina Faso's AMP National Project on 16 February 2023. Burkina Faso gets most of its electricity from biofuels like charcoal and wood while oil products account for one-third of the total energy supply, says the International Energy Agency.
