

# Do photovoltaic panels have anti-backflow function

## Overview

---

The photovoltaic system with CT (Current Transformer) has anti-backflow function, which means that the electricity generated by photovoltaics is only supplied to loads, preventing excess electricity from being sent to the grid. Why do you need anti-backflow?

. An usual photovoltaic power generation system converts AC to DC. The generation of reverse current usually occurs when the PV system generates more power than the load demand, and when the power cannot be fully consumed, the. In this video, APsystems dives into the crucial topic of anti-backflow in photovoltaic (PV) systems. When microgrid. To prevent backflow in solar panels, the installation of 1. load management systems is crucial.
