

# East timor increased renewable energy penetration

## Overview

---

Timor-Leste plans to implement 72 MW solar and 50 MW wind by 2024 and 2026 respectively. This will increase RE share in power generation from 0. Under the current policies, GHG emission from the energy sector are expected to drop by 30% by 2030, compared. Timor-Leste, also known as East Timor, is a small island nation in Southeast Asia that faces significant energy challenges. Since gaining independence from Indonesia in 2002, it has struggled with a weak energy infrastructure and a heavy reliance on imported fossil fuels, despite having rich. DILI, Timor-Leste - Decem—Timor-Leste is pursuing a strategic dual-track energy policy: aggressively moving forward with the development of its Greater Sunrise gas reserves while simultaneously allocating substantial funds to catalyze a clean energy transition. While the small Southeast Asian nation — and one of the world's youngest countries — has made international and domestic pledges to reduce its carbon footprint through untapped solar and other renewable energy potential, it. of capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across th sured at a height of 100m. International support is.
