

# Eastern European wind power station generators

## Overview

---

The Europe wind turbine generator market was valued at US\$ 975.33 million in 2022 and is expected to reach US\$ 2. Please sign in to receive proper access rights. In 2017, a total of 15,680 MW of wind power was installed, representing 55% of all new power capacity, and the wind power generated 336 TWh of electricity, enough to supply 11.6% of the EU's electricity consumption. [2] In Q4 2023, wind power exceeded coal in European electricity generation for the first time. We lead the onshore wind market with over 40 years of expertise, specialising in wind turbine design and development. We have an unrivalled track record of making wind work at sea, bringing offshore wind to life in even the most challenging environments. There is an increase in demand for a clean energy source as it eliminates greenhouse gases, reduces.

In 2014 wind power in Denmark provided some 39 per cent of Danish domestic electricity and Denmark is a leading wind power nation in the world. The Danes were pioneers in developing commercial wind power during the 1970s and today almost half of the wind turbines around the world are produced by Danish manufacturers such as Vestas and Siemens Wind Power.
