

Electric vehicle adoption dushanbe

Overview

By September 2025, the city aims to completely replace its traditional taxi fleet with electric vehicles (EVs). This ambitious plan aligns with global trends towards sustainability and reflects Tajikistan's commitment to reducing its carbon footprint and improving air quality in. Switching from conventional fossil fuel vehicles to electric vehicles (EVs) offers a promising way to reduce carbon emissions, especially if we also decarbonize our electricity sources. This study focuses on Dushanbe, the capital of Tajikistan, where EV adoption is still in its early stages. While switching to electric vehicles is cost-effective for Tajikistan, this will require specific policies because of higher upfront costs, lack of infrastructure (i.
