

# Electricity consumption baghdad

## Overview

---

Ali Zarkani, chairman of the Oil and Gas Committee at the Baghdad Provincial Council, told reporters that the Ministry of Electricity currently provides only 5,500 megawatts (MW) of electricity daily to Baghdad, while the capital's actual demand exceeds 12,000 MW. Iraq's electricity generation primarily depends on fossil fuels. In 202, natural gas was the largest source at 50. Renewable energy, mainly from hydroelectric power, contributed 2%. [1] As of 2023, the 30 gigawatts (GW) of installed capacity cannot meet. Electricity consumption in Baghdad is a significant issue, reflecting broader challenges in Iraq's energy sector. **\*\*High Consumption Rates\*\***: Baghdad consumes approximately 45% to 50% of Iraq's total electricity production.
