

Energy conservation kiev

Overview

In collaboration with international partners, efforts focus on rebuilding energy systems, enhancing energy security, and promoting sustainable development. Particular attention is given to the green transition, with initiatives aimed at fostering the use of cleaner, renewable. Under the Kiev Public Buildings Energy Efficiency Project, 1,270 public buildings in the city of Kiev—including healthcare, educational and cultural facilities—were retrofitted with cost-effective, energy-efficiency systems and equipment. The project focused on the supply-side, such as automation. Who is affected: state bodies, local governments, state and municipal enterprises, institutions, and organizations

Summary: these restrictions do not apply to healthcare facilities, enterprises where air conditioning is part of the technological process, and traffic lights. Yet, through incredible skill and resourcefulness, Ukraine has managed to keep the lights on through the winter. 30, 2025, 6:01 pm Ukrainian Firefighters tackle a fire at an electrical substation after a missile. Our office is committed to strengthening energy resilience and infrastructure in Ukraine and Moldova. With the use of these tools, developments were carried out at the.
