

Energy storage lithium-ion battery cost per kilowatt-hour

Overview

BloombergNEF's 2025 survey finds average lithium-ion pack prices dropped 8% to \$108/kWh, driven by LFP adoption, overcapacity, and competition. Stationary storage costs plunged 45%, EV packs averaged \$99/kWh, with China leading lowest prices. In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are developed from an analysis of recent publications that include utility-scale storage costs. New York - Decem- According to. dollars per kilowatt-hour a year earlier. Over recent years, high-scale production and capital investment into the battery production process have made lithium-ion battery packs cheaper and more efficient.

Energy storage lithium-ion battery cost per kilowatt-hour

Cost of Battery Storage Per kWh: 2026 Pricing Guide

The cost of battery storage per kWh ranges from \$700 to \$1,300 installed for residential systems and \$125 to \$334 for utility-scale projects as of late 2025. Battery pack prices alone have ...
