

Energy storage technology of lithium manganese oxide battery

PUSUNG-R (Fit for 19 inch cabinet)

Overview

A lithium ion manganese oxide battery (LMO) is a that uses (MnO_2), as the material. They function through the same /de-intercalation mechanism as other commercialized technologies, such as (LiCoO_2). Cathodes based on manganese-oxide components are earth-abundant, inexpensive, non-toxic, and provide better thermal stability.

Lithium ion manganese oxide battery

A lithium ion manganese oxide battery (LMO) is a lithium-ion cell that uses manganese dioxide (MnO_2), as the cathode material. They function through

the same intercalation/de-intercalation mechanism as other commercialized secondary battery technologies, such as lithium cobalt oxide (LiCoO_2). Cathodes based on manganese-oxide components are earth-abundant, inexpensive, non-toxic, and provide better thermal stability.
