

# Environmental project using 40kWh collapsible containers

## Overview

---

Each container is equipped with a photovoltaic array, a battery. The H10GP-M-30K40 delivers 30kW of solar generation and 40kWh of storage, housed in a 10ft mobile foldable container. Using high-efficiency 480W panels, it's engineered for mid-size off. SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects. What energy storage container solutions does SCU offer?

SCU provides 500kwh to 2mwh energy storage container solutions. These structures repurpose shipping containers—often discarded after their maritime lifespan—into durable, modular living spaces. These containerized units integrate solar panels, inverters, and battery storage into a compact and mobile system, allowing sites to operate independently without reliance on. A collapsible, or mobile, solar panel container is a self-contained, transportable solar power system built within a standard shipping container frame.

### ENERGY STORAGE SYSTEM

**Product Model**  
 HJ-ESS-215A(100KW/215KWh)  
 HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
 1600\*1280\*2200mm  
 1600\*1200\*2000mm

**Rated Battery Capacity**  
 215KWH/115KWH

**Battery Cooling Method**  
 Air Cooled/Liquid Cooled

## Collapsible Solar Panel Containers: Portable Energy Solutions

Essentially, a collapsible container merges the portability of a shipping container with the clean energy of solar panels--forming a complete off-grid power station that can be shipped, parked, ...
