

Estonian mobile energy storage power supply manufacturer

Overview

Baltic Storage Platform, a joint venture (JV), has broken ground on two new 200MW/400MWh battery energy storage systems (BESS) in Estonia. Skeleton Technologies is a leading manufacturer of energy storage solutions, specializing in supercapacitors and their innovative SuperBattery technology, which enhances energy density and addresses stability challenges. Their products are utilized by global OEMs across various sectors, including Estonia's Tartu Energy Storage Power Station exemplifies how battery storage systems stabilize grids overwhelmed by solar and wind energy. With 47% of Estonia's electricity now coming from renewables (2023 National Energy Report), such projects prevent blackouts and reduce fossil fuel dependency. The JV between Estonian energy company Evecon, French solar PV developer Corsica Sole, and asset manager Mirova will develop the 2-hour duration systems, with. The system is built from 10 to 16 modules of 14.4kWh or 16kWh capacity and 1 single BMS module. Are energy storage systems scalable?

We deliver Low Voltage, High Voltage, and Utility-Scale Storage Systems that are scalable.
