

Experiences of wind power station inspection

Overview

By incorporating advanced technology into asset management, it's now possible to carry out real-time inspections—without halting production and, most importantly, without putting operators at risk. In the past, turbine inspections were carried out manually. Efficiency in wind farms is closely linked to the care and maintenance of wind turbines. In some countries, regular inspections are a legal requirement; and many. Wind energy is a vital part of our global energy mix, but to keep wind turbines efficient and safe, regular inspections are essential.

Experiences of wind power station inspection

ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW/115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWh/115KWh

Battery Cooling Method
Air Cooled/Liquid Cooled

WPO , Why are regular wind turbine inspections critical for asset

Using drones, thermal imaging, and AI-powered analytics, inspections today are faster, safer, and more accurate than ever. No more risky rope access or long downtimes - just actionable ...
