

External electrical installation of communication base station

Overview

Here's a step-by-step guide to the process: 1. Site Acquisition and Survey
Objective: Select and acquire a suitable location for the BTS. Activities: Identify coverage gaps or expansion areas. A typical communication base station combines a cabinet and a pole. Meanwhile, the pole serves as a mounting point for antennas, Remote Radio Units (RRUs), and. onnected to the Gateway using any cabling. The following topics are discussed: The list below describes typical configurations that could comprise a communications equipment site. It usually connects the device to other networks or devices through a dedicated high bandwidth wire of fiber optic connection.
