

Finland solar energy for the environment

Overview

Solar power in Finland is contributing to the transition towards low-emission energy production. Technological development, falling costs and climate goals have together accelerated the spread of solar power in Finland, although its location in the north poses its own challenges. Renewables Finland currently maintains three up-to-date lists and statistics that track the development of solar power in Finland. To fuel this expansion, the country's energy agency, Energiavirasto, will allocate €16.

Finland solar energy for the environment

Finland adds 227 MW of utility-scale solar in 2025 - pv magazine

Official data covering Finland's smaller-scale solar installations in 2025 is yet to be published. Last June, the Finnish Energy Authority said Finland's cumulative solar capacity reached ...
